

"Reviewing thousands of abstracts takes forever. Can we **speed** this up?
I need to find studies relevant to my **PICO**,
even if they use **different terminology**."

1

2

"Sometimes I want a **quick scan** of
multiple study abstracts, other times I
need to **read in detail**."

"**DenseReviewer** uses **dense retrieval**
for **semantic ranking**, and your **feedback**
prioritises studies **on the fly**, without
retraining the model."

"That's why we built **Screening Mode** — you
get a ranked list to browse efficiently. And
when you want to read in depth, switch to
Focus Mode for distraction-free reviewing."
